

Samsung Galaxy S i500

Wi-Fi Hotspot Setup Instructions

1. In the application menu, select the **Mobile AP** icon.
2. Check the box marked **Mobile AP**.
3. Select **Configure** from Settings.
4. In the Mobile AP Settings box, select **Automatic** or **Manual**. If you selected Automatic, please skip to step **8**.
5. If you selected Manual, create your **Network Name** (SSID) as whatever you would like to identify it as.
6. Create a **Password** for the connection. It is automatically set to your mobile number.
7. Click "**Done**"
8. To connect a device to your created Mobile AP hotspot, activate Wi-Fi on that device.
9. Find your Network Name in the network list. Your Network Name is listed on your mobile. In Mobile AP, scroll to the bottom of the screen. Your Network Name is listed under instruction #2.
10. After selecting your Network Name on the other device, type in your password in the WPA field. The password is listed on your mobile device under instruction #3.
